

Excerpt from an article, “Post-Graduate Education with International Relevance,” *The Japan Times* (July 27, 2018), p. 8.

... UT Austin President Gregory Fenves conducted a research sabbatical as a visiting professor at Kyoto University in 2008, while Satoshi Kashima, the lead designer and engineer of the Akashi Kaikyo Bridge, the world’s longest suspension bridge, received his master’s and doctoral degrees in civil engineering from the university. ... “The engineering sense and project management skills cultivated at the University of Texas were very useful to me in the work for the Akashi Kaikyo Bridge in Japan. Anyone interested in acquiring a world-class education with international relevance should consider UT Austin,” Kashima said.
